Hello, an important note we have just received the FFV on the methods of calculating disability HN.

I give you a copy.

"FORMULA HN France: CIRCULAR January 2012

NoteEnrouleur.docx of 12/12/11 9:12 p.m. Page 1 / 1 imp 12/12/2011 9:02:00 p.m.

Change of linen before for vessels equipped with furling genoa. found freedom. Reduce its web

before

winding the

jib.

This solution

was previously

combined with

an

average bonus

of half a

group (a

length

and a half

miles), with the

corollary of

the absolute prohibition of

change

of linen

before.

But

the bonus

was only

average compensation

was far

from unanimous.

His presence

made it a

permanent

"undeserved

gift" to some

paces

"(downwind), and

an"

inadequate compensation

"to other

(upwind in

the breeze).
And numerous
distortions
point,
"unmerited" between
identical boats
to
different options.
Established at
a time when
almost
in the breeze
was more common
than now,
with
less efficient
equipment,
this bonus
has become obsolete.
After
the experiment
was announced in
2010, the observatory
speeds
was recalculated
by removing
the full impact
of these devices,
to inform
the decision
for 2012.
From
January 2012
the methods of
reducing
headsail
become
transparent to
the gauge,
without
bonus
or
penalty,
which is wound
a
genoa
